IT Governance
Workshop

Introduction

As technological advancements and IT best-practices intertwine with overall business objectives, successful enterprises demand optimal governance to ensure IT projects, assets and processes are seamlessly aligned with overall goals and key business decisions while keeping a check on technology and cyber security risks.

The proposed IT Governance Workshop has been structured to provide participants with a comprehensive understanding of IT governance principles, frameworks, and best practices. The masterclass will present various aspects of IT governance, including strategy alignment, risk management, compliance, and performance measurement.

This workshop has been designed keeping a balanced mix of theoretical knowledge, practical insights and interactive activities to ensure participants gain a comprehensive understanding of IT governance principles and its application in real-world scenarios.

High Level Topic Coverage

This workshop provides a structured approach to understanding and implementing effective IT governance practices, ensuring alignment with organizational goals, efficient resource management, and continuous performance improvement.

This workshop will cover the following core topics:

1. Introduction to IT Governance and Frameworks

2. IT Strategic Alignment and Benefit Realization

3. IT Resource Management

4. Performance Measurement and Improvements
